Kaye

Designed in 2012

The beautiful Kaye 3-speed versatile-mount, wall or ceiling fan, oscillates left to right, forward and reverse, in a 90° sweep. Its design is reminiscent of vintage train cabin ventilators of yester-year, and will cool down your favorite space with poise and determination. Kaye's profile is low, however its strength and character define it. Kaye can be mounted in any small or awkward spaces or in front of HVAC ducts to improve the efficiency of the heating, ventilation or air conditioning of your favorite space. Constructed of cast aluminum and heavy stamped steel, the Kaye carries a limited lifetime warranty.
