LED201 Summit ACLED Track Head

Product Features

Summit series track and rail heads are the perfect replacements for halogen MR16s as they offer lower wattage with superior lumen output, over 10 times the rated life span, less maintenance, no projected heat, and all Summit series track luminaires are equipped with BeamShift? technology, allowing in-field modification of beam angle with no additional tools or accessories simply by changing the location of the lens. For use with 120V track. Track Fixture is available in H, J/J2, and L track configurations. Order according to track layout specifications.
