Product Features

The China Hat LED Light is a sleek and stylish lighting option suitable for a variety of settings. Made of either cast aluminum or cast brass, this light features a matching 3" extruded aluminum or brass post and a tempered flat glass lens. It is equipped with a 7w ARROW Super Saver MR16 LED or a 15w LED module as the light source, both of which have a lifetime rating of 40,000/50,000 hours. The 15w LED module is equipped with an on-board 12v internal driver, while the 120v internal driver is a HW-12-60LED transformer. The MR16 socket features a high temperature ceramic GU5.3 bi-pin with 250°C silicone lead wires, and the LED module does not have a socket as it is hardwired inside the fixture. This light is mounted using a U-bracket with four screws and is finished with a black texture polyester powder coat for the aluminum version and unfinished brass for the brass version. Optional finishes are available for both versions.
