

6in JPDZ4JB Canless Downlight

Product Features

With Contractor Select Juno Podz 6-inch LED canless downlights, ordering, stocking, and installing is easier than ever before as the trim and remodel junction box are packaged altogether in one single carton. Juno Podz combines a low profile, IC rated mechanical form of less than 3" tall with the appearance of a deeply regressed downlight that installs directly into the plenum, eliminating the need for a traditional recessed housing. Additionally, the Podz LED downlights allow for flexibility in lumen and color temperatures by providing switches directly on the fixture to toggle between 700 lumens, 1000 lumens or 1200 lumens and 27K, 30K, 35K, 40K or 50K color temperature options, including a WarmDim (2850K-1900K) feature that provides the warmth and ambiance of traditional incandescent light sources. The dimmable LED light engine features cutting-edge color mixing technology which delivers exceptional color rendering at all LED color temperatures and is offered in 120-volt.
