

# Teppo Table Lamp

## Product Features

The genius of a talented modern architect lies in the ability to extrude everything out of a room until all that's left is pure space. The design of our Teppo Table Lamp expresses a similar lightness of being. Consider the thinness of the oil-rubbed bronze frame, the simplicity of its placement and the minimalistic way it holds the off-white shantung shade. Also notice the recessed plinth in a contrasting antique brass finish and the thinness of the top layer of the base. Combined, all of these moves could have been made by one of the rare masterminds of the contemporary era.
