## Besa Glitter 15 Ceiling

### Product Features

The Glitter Ceiling, utilizing tightly ridged contours and technologically advanced inner crystal coating, projects an awe-inspiring sparkle effect. Our Glitter glass is a clear blown and a technologically advanced crystal coating applied to the inside. The coating contains multiple micro-layers of glass particles that create unique prismatic optical properties, which effectively alter both the reflected and transmitted light. So unlit, it appears like a frosted glass; when lit, it becomes alive with dazzling light effects.
