Besa Pica 14 Ceiling

Product Features

Our Pica Creme flush mount begins with a clear blown glass, with glossy outer finish and frosted bottom. We then, using a handcrafting technique, carefully apply a band of actual fine-grained sand to the inner surface of the glass, where creme color is fully saturated into the coating for a bold statement. A final clear protective coating is applied to seal and preserve the accent material. The result is a beautifully textured work of art, comfortable with the irony of sand being applied to a glass that ordiates from sand. When illuminated, the colors shimmers through the noticeable refractions created by every granule, as the sand patterning is obvious and pleasing.
